

Paweł Drojecki

Fullstack Developer - React / TypeScript / Node.js

Poznań, Poland / remote

[LinkedIn: www.linkedin.com/in/pawel-drojecki](https://www.linkedin.com/in/pawel-drojecki)

[Portfolio: www.drojecki.pro/portfolio](https://www.drojecki.pro/portfolio)

Fullstack Developer with professional web development experience since 2021. At Swarmcheck, I developed a Python automated fact-checker, gRPC communication, backend endpoints, RBAC authorization and React / D3.js interfaces. I build Nest.js / MongoDB backends and React / Next.js applications, and maintain enterprise React / TypeScript code for The Royal Mint. My academic work included fMRI imaging and eye-tracking data processing. I would like to join Creotech, as working in the space industry has long been an ambition of mine. In my spare time, I also develop my electronics skills and expand my knowledge of physics.

SKILLS

Frontend	React.js / Next.js / TypeScript / JavaScript / HTML5 / CSS / Tailwind CSS / Responsive interfaces
Backend and APIs	Python / Django / Node.js / Nest.js / Express.js / REST APIs / gRPC / RBAC authorization / Docker / AWS S3 / Microsoft Azure
Data and visualization	MongoDB / PostgreSQL / Data modeling / D3.js graph visualization / Automated fact-checking / fMRI / eye-tracking data processing
Product integrations	Stripe payments / Resend transactional email / HLS video streaming / Google Analytics
Mobile and delivery	React Native / Expo / Application architecture / Debugging and maintenance / Remote collaboration

EXPERIENCE

Fullstack Developer - Swarmcheck

Jun 2021 - Jul 2024
Remote

Web application for structured argumentation, fact-checking and data work.

[Case study: www.drojecki.pro/projekty/swarmcheck](https://www.drojecki.pro/projekty/swarmcheck)

- Developed an automated fact-checker in Python and implemented gRPC communication.
- Implemented a custom RBAC authorization system and backend endpoints for controlled data workflows.
- Built React interfaces and D3.js graph visualizations for exploring relationships between arguments.
- Worked across frontend and backend responsibilities in a product with data, access and collaboration concerns.

Tech: React.js / Node.js / Express.js / D3.js / Microsoft Azure / RBAC / Python / gRPC

Frontend Web Developer - NoA Ignite Poland

Jul 2024 - present
Remote

Frontend work for an enterprise e-commerce platform for the precious metals market.

[Case study: www.drojecki.pro/projekty/royal-mint](https://www.drojecki.pro/projekty/royal-mint)

- Developed and maintained React and TypeScript frontend features in a legacy enterprise e-commerce codebase.
- Debugged, optimized and modernized UI code while keeping existing commercial flows stable.
- Supported Google Analytics work and frontend improvements for product and purchase experiences.

Tech: React.js / TypeScript / Bootstrap / Microsoft Azure / Auth0 / Google Analytics / E-commerce

PROJECTS

Swarmcheck

Jun 2021 - Jul 2024
Remote

Fullstack Developer - Swarmcheck

[Case study: www.drojecki.pro/projekty/swarmcheck](https://www.drojecki.pro/projekty/swarmcheck)

- Developed an automated fact-checker in Python and implemented gRPC communication.
- Implemented a custom RBAC authorization system and backend endpoints for controlled data workflows.

Tech: React.js / Node.js / Express.js / D3.js / Microsoft Azure / RBAC / Python / gRPC

Juli Jogi

Sep 2026 - present

Backend developer / DevOps

[Case study: www.drojecki.pro/projekty/juli-jogi](https://www.drojecki.pro/projekty/juli-jogi)

- Designed the Next.js frontend / Nest.js backend architecture, MongoDB data layer and Resend communication integrations.
- Prepared course and lesson workflows, HLS video streaming and a test environment for further development.

Tech: Next.js / React.js / TypeScript / Nest.js / MongoDB / Resend

CleanStrategy

Jan 2024 - present

Mobile developer / product builder

[Case study: www.drojecki.pro/projekty/cleanstrategy](https://www.drojecki.pro/projekty/cleanstrategy)

- Designed and developed a React Native / Expo product with task flows, schedules and household responsibility logic.
- Built the supporting Nest.js and MongoDB backend so mobile and web clients can evolve in parallel.

Tech: React Native / Expo / TypeScript / React.js / Nest.js / MongoDB / Tailwind CSS

Moment Studio

Fullstack developer

Case study: www.drojecki.pro/projekty/moment-studio

- Built the frontend, Nest.js backend, MongoDB product model, Stripe payments and transactional email flow.
- Translated brand direction into responsive, product-focused commerce interfaces.

Tech: React.js / Nest.js / MongoDB / Stripe / Resend / JavaScript / Tailwind CSS / E-commerce

Jan 2024
